

For the product safety department in our headquarters in Neuwied we are currently looking for an

EXPERT REGULATORY AFFAIRS AND PRODUCT STEWARDSHIP (F/M)

We at Lohmann are on a permanent journey towards making our world smarter. With our more than 1 700 employees at 28 international sites we develop new, industrial, high-tech bonding solutions. Looking back on a success story that is more than 165 years old, we are driven by our will to continuously advance our products and processes. We want to build something new and invest in the future.

Lohmann products are used in automotive, electronics, medical devices, consumer goods, building and construction. They are subject to varying industry requirements as well as to international and country specific legislation. The product safety department services the business with information regarding safety of products and raw materials, regulatory affairs and product stewardship.

Your tasks

- Classification of adhesives and mixtures, authoring Safety Data Sheets
- Participate in R&D project teams to identify and address regulatory issues
- Answer questions about product compliance and customer specific requirements
- Communication with suppliers of raw materials and research institutes, review of raw material data and test reports
- Legislation monitoring and review of the impact of new developments on the product portfolio of Lohmann
- Perform product safety evaluations (food contact, biocompatibility)
- Build and manage a system for the Material datasheets in the IMDS

- Maintain documentation on raw materials and products, database development

Your profile

- Master or PhD in chemistry (preferred) or related sciences, experience with polymeric materials or analytical chemistry is an advantage
- Experience in regulatory affairs (preferred) or R&D
- Professional working proficiency in English (min. B2 level)
- Able to prioritize and work efficiently and organized
- Good communication skills and able to critically review information
- IT skills and affinity, especially database skills are an advantage
- Experience in at least one of the following: authoring of Safety Data Sheets, IMDS
