

# Lab-on-a-Chip

Diagnostics.

## Customer benefits:

- Highly transparent and blister-free transfer tapes for optical clear applications
- Non-migrating adhesives
- No interaction with biochemical reagents (inert systems)
- Different product designs and constructions
- Flexibility in function with different material combinations
- Adaptable presentation in rolls and die cuts

## Products:

- Highly precise die cuts
- Adhesive tapes and non-adhesive solution
- Fully transparent to light absorbent carrier material
- Spacer-tapes, double sided tapes, printed and unprinted cover-tapes
